Villaflores, Chiapas, Mexico

## Professional Profile

Full Stack Developer and UX/UI Designer with over two years of experience building scalable, user-centered web applications. Specialized in Angular with proficiency across multiple frontend (React, Vue, Astro) and backend (Spring Boot, Express, Flask, FastAPI) technologies. Proven track record leading development teams and designing intuitive interfaces that enhance user experience. Passionate about clean code architecture, development best practices, and continuous learning of emerging technologies.

## Professional Experience

### Frontend Development Team Leader & UX/UI Designer

*Suchiapa Medical Unit System (SUMS)*

**April 2025 – May 2025**

- Led a frontend development team of 5 developers in creating a population census management system for medical units, coordinating workflows and ensuring project milestones were met.
- Designed and developed modular Angular components following Clean Architecture principles, improving code maintainability and scalability by 40%.
- Created comprehensive user interfaces using Figma, ensuring an intuitive and accessible experience for medical and administrative staff.
- Implemented effective communication strategies and agile methodologies that increased team productivity by 30%.
- Managed version control through Git/GitHub, establishing collaborative workflows and code review processes.

### Full Stack Developer

*Gear Hackathon – Vara Network*

**October 2024**

- Developed a Web3.0 blockchain-based solution to address a real-world problem, integrating decentralized technologies.
- Implemented both frontend and backend components, working with smart contracts and blockchain technologies.
- Collaborated within a multidisciplinary team under tight deadlines, delivering all requirements within the established timeframe.
- Presented the solution to a judging panel, demonstrating technical communication and pitching skills.

## Technical Skills

**Programming Languages:** TypeScript, JavaScript, Python, Java, Go, C++, HTML5, CSS3

**Frontend:** Angular (specialized), React, Vue, Astro, JavaFX | SCSS, Tailwind CSS, Bootstrap

**Backend:** Spring Boot, Express.js, Flask, FastAPI, Ktor, Javalin

**Databases:** MySQL, PostgreSQL, MongoDB

**Tools & DevOps:** Git, GitHub, Docker, AWS (Cloud Foundations, Developing, Architecting)

**UX/UI Design:** Figma, Canva, Adobe Photoshop | Prototyping, Design Systems, Accessibility

**Methodologies:** Agile/Scrum, Clean Architecture, Design Patterns, RESTful APIs

## Education

**Bachelor's Degree in Software Engineering** (8th Semester)

**2023 – Present**

*Universidad Politécnica de Chiapas*

## Relevant Certifications

---

- **Google UX Design Professional Certificate** – Coursera 2024
